PRODUCT SPECIFICATION SHEET | **SKU RK-35**

RK-35 Brass Impact Sprinkler – 3/4" MNPT Part Circle 25°

The RK-35 is a 3/4" MNPT part-circle brass impact sprinkler with dual 11/64" x 1/8" nozzles, a flow range of 3.6–12.6 GPM, and a radius of 44.3–55.1 ft at 30–55 PSI. Its adjustable part-circle arc makes it the standard choice for perimeter rows, field edges, and any position where full-circle coverage would waste water outside the irrigated area.

SPECIFICATIONS

Connection	**3/4" MNPT**
Coverage Pattern	**Part Circle**
Trajectory	**25°**
Nozzles	**11/64" x 1/8"**
Flow Range	**3.6–12.6 GPM**
Radius	**44.3–55.1 ft**
Pressure Range	**30–55 PSI**
Body / Arm	**Bronze**
Nut / Tube	**Brass**
Spring / Pin	**Stainless Steel**
Drive	**Spring Arm Impact**

FEATURES

- Adjustable part-circle arc — limits coverage to the irrigated zone, reducing water waste at field boundaries and around structures.
- Dual nozzle set (11/64" x 1/8") — select flow rate to match system hydraulics without changing the sprinkler body.
- 3/4" MNPT connection — standard agricultural riser size for seamless integration into existing 3/4" lateral systems.
- Bronze body and arm — corrosion-resistant for continuous agricultural service.
- Brass nut and tube — precise nozzle alignment for consistent distribution across the wetted arc.
- Stainless steel spring and pin — reliable, low-maintenance impact drive mechanism.
