

PRODUCT SPECIFICATION SHEET | **SKU RKPC2**

Pressure Compensating Take-Apart Dripper – 0.5 GPH (2 LPH) – Yellow

SPECIFICATIONS

Flow Rate	0.5 GPH (2 LPH)
Connection	1/4" Barb Inlet, 6 mm Outlet
Type	Pressure Compensating, Take-Apart
Color	Yellow

Pressure compensating take-apart dripper – delivers a consistent 0.5 GPH (2 LPH) regardless of pressure variations across the system. The take-apart design allows disassembly for cleaning if clogged.

Install on 1/8" or 1/4" micro-tubing, or insert directly into the side of poly tubing. Color-coded yellow for easy flow rate identification.

FEATURES

- Pressure compensating – consistent 0.5 GPH output across a range of operating pressures for uniform watering
- Take-apart design – disassemble for cleaning if clogged; no need to replace the emitter
- Versatile installation – connect with 1/8" or 1/4" micro-tubing (spaghetti tubing), or insert directly into the side of poly tubing
- 6 mm outlet – accepts spider distribution assemblies (RKARRL4) for multi-point distribution from a single dripper
- Color-coded yellow – easy visual identification of flow rate
