PRODUCT SPECIFICATION SHEET | **SKU RKPC8**

Pressure Compensating Take-Apart Dripper – 2.1 GPH (8 LPH) – Blue

Pressure compensating take-apart dripper — delivers a consistent 2.1 GPH (8 LPH) regardless of pressure variations across the system. The take-apart design allows disassembly for cleaning if clogged.

Install on 1/8" or 1/4" micro-tubing, or insert directly into the side of poly tubing. Color-coded blue for easy flow rate identification.

SPECIFICATIONS

Flow Rate	**2.1 GPH (8 LPH)**
Connection	**1/4" Barb Inlet, 6 mm Outlet**
Type	**Pressure Compensating, Take-Apart**
Color	**Blue**

FEATURES

- Pressure compensating — consistent 2.1 GPH output across a range of operating pressures for uniform watering
- Take-apart design — disassemble for cleaning if clogged; no need to replace the emitter
- Versatile installation — connect with 1/8" or 1/4" micro-tubing (spaghetti tubing), or insert directly into the side of poly tubing
- 6 mm outlet — accepts spider distribution assemblies (RKARRL4) for multi-point distribution from a single dripper
- Color-coded blue — easy visual identification of flow rate
