PRODUCT SPECIFICATION SHEET | **SKU RKPR-2**

2" Pressure Relief Valve - 22-120 PSI (Preset 80 PSI) - FNPT

2" pressure relief valve for protecting irrigation systems from pressure surges and water hammer. Adjustable from 22-120 PSI, factory preset at 80 PSI. Large External Spring.

When line pressure exceeds the set point, the valve opens to release excess pressure and closes automatically when pressure returns to normal. Cast aluminum body with stainless steel shaft. Higher pressure range (up to 120 PSI) with external spring for wider adjustability.

SPECIFICATIONS

Size	**2" FNPT**
Valve Action	**Pressure Relief**
Adjustable Range	**22-120 PSI**
Factory Preset	**80 PSI**
Spring Type	**Large External Spring**
Body Material	**Cast Aluminum**
Shaft	**Stainless Steel**

FEATURES

- Provides pressure surge protection for irrigation systems
- Adjustable pressure setting maximizes performance for individual applications
- High-strength cast aluminum body and stainless steel shaft offer strength and corrosion resistance
